

DECLARATION OF SAFETY

Products: Untreated and Melamine Coated Particleboards

Company

**Pfleiderer Deutschland GmbH
Ingolstädter Straße 51
92318 Neumarkt**

The untreated and melamine coated particleboards produced by Pfleiderer Deutschland GmbH are applied for timber frame constructions, for furniture making, interior furnishings as well as for general construction purposes. All products are manufactured in accordance with the stipulations of EN 312 (untreated particleboards) and EN 14322 (melamine coated particleboards). The boards are analyzed by independent testing institutions twice per year for formaldehyde emission and other hazardous substances.

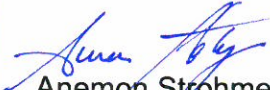

Furthermore, the examined core boards fulfilled the following criteria:

Content of formaldehyde	≤ 0,1 ppm according to EN 717-1 (according to Chemicals Prohibition Ordinance, valid from 01.01.2020, so-called Standard E05)
Content of pentachlorophenol	≤ 3 mg/kg
Content of lindane	≤ 1 mg/kg

This declaration of safety is valid one year from the date of issue and includes the examined particleboard type P2, P4, P5 und P6.

The company Pfleiderer Deutschland GmbH is furthermore a member of the Quality Association for Wood Based Panels (Qualitätsgemeinschaft Holzwerkstoffe e. V.)
